

TOKENGO

**A fair rewarding, powered
blockchain based, business
tokenization platform February**

TOKENGO — blockchain based

**Blockchain
Applicability**

How It Works:

EXAMPLES OF TOKENGO PLATFORM APPLICATION:

Performing ICO Procedures

Voting

Creating In-House Cryptocurrency

Financial Payments

Owning Tokens

Automatic Accounting

Voting Widgets

Authentication and Notary Certification

Issuing Certificates

TokenGo Consensus

TokenGo consensus utilizes an adapted and modified DPoP (Delegated Proof of Power) algorithm, which is based on the DPoS/PoW hybrid algorithm. Its specific features include the use of a special token, GoPower, which is the basis for determining minting-priority and voting power when electing delegates.

We can define three fundamental facts in favor of the DPoP consensus algorithm:

an incredibly high transaction rate in the network

democracy

a high degree of manageability

Business Tokenization

Capabilities of Tokens Related

- 1 it is a powerful financial tool
- 2 it is a tool designed to control participants' and investors' behavior.
- 3 tokenization of business processes as components

Main conditions for a successful ICO

- 1 Closeness and natural token circulationIt
- 2 Providing Investment Attractiveness
- 3 Proper Integration into Business Processes and RealAdditional Value of the Token Use

Main Components of the TokenGo Closed Ecosystem

TokenGo Web Platform

TokenGo ICO Website Constructor

TokenGo Smart Contract Constructor

TokenGo Cryptocurrency Exchange

TokenGo Voting Harvesting

TOKENGO GOPOWER AND GOCOIN

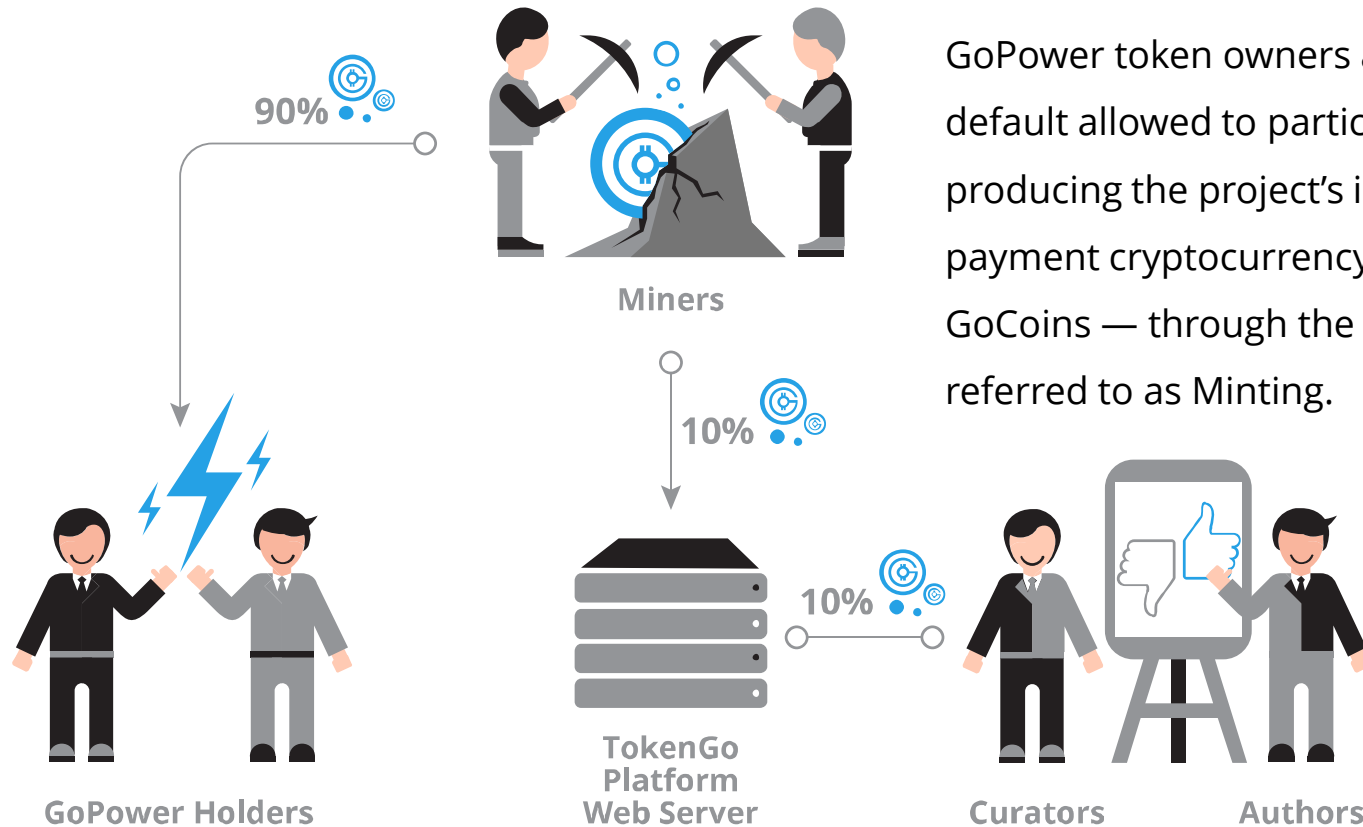

GoPower (GPT)

GoPower is a token emitted on the Ethereum blockchain. GPT is the fundamental highly liquid unit of the platform and is used for the TokenGo ICO.

GoCoin (GOC)

is a single payment instrument on the TokenGo platform, a cryptocurrency which is generated daily as a result of minting based on the proprietary, modified DPoP consensus algorithm. GoCoin is distributed among the platform participants by a special algorithm and provides financial backing for ICO procedures on the TokenGo blockchain.

TOKENGO CLOSED ECOSYSTEM

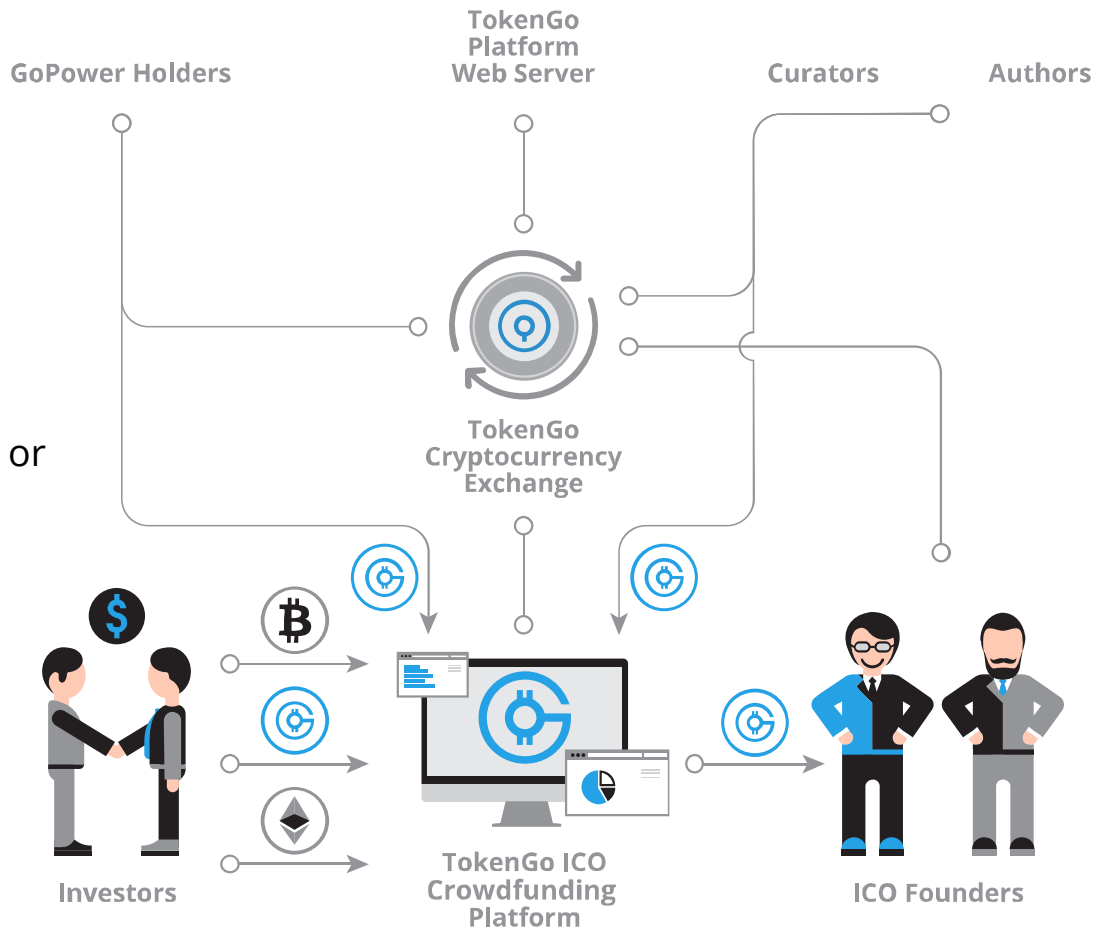

GoPower token owners are by default allowed to participate in producing the project's in-house payment cryptocurrency — GoCoins — through the process referred to as Minting.

GOC are distributed among all GoPower token holders as a reward.

The participants of the Activity and harvesting receive remuneration

TOKENGO CLOSED ECOSYSTEM

GOC can be purchased using some popular cryptocurrencies or fiat money.

Originators of projects and business models interested in holding ICO procedures will purchase GOC as the only means of settlement with TokenGo when implementing campaigns for those projects.

Thus, a closed cycle is formed, which continuously maintains the attractiveness of the in-house coin (GOC) and the GoPower token.

Harvesting and Activity

the process of earning money and obtaining rewards by active Authors and Curators for their contribution to and participation in the platform operation by certain algorithm and for a particular settling period.

Voting Power — is directly dependent on GoPower and GoCoins held by the participant.

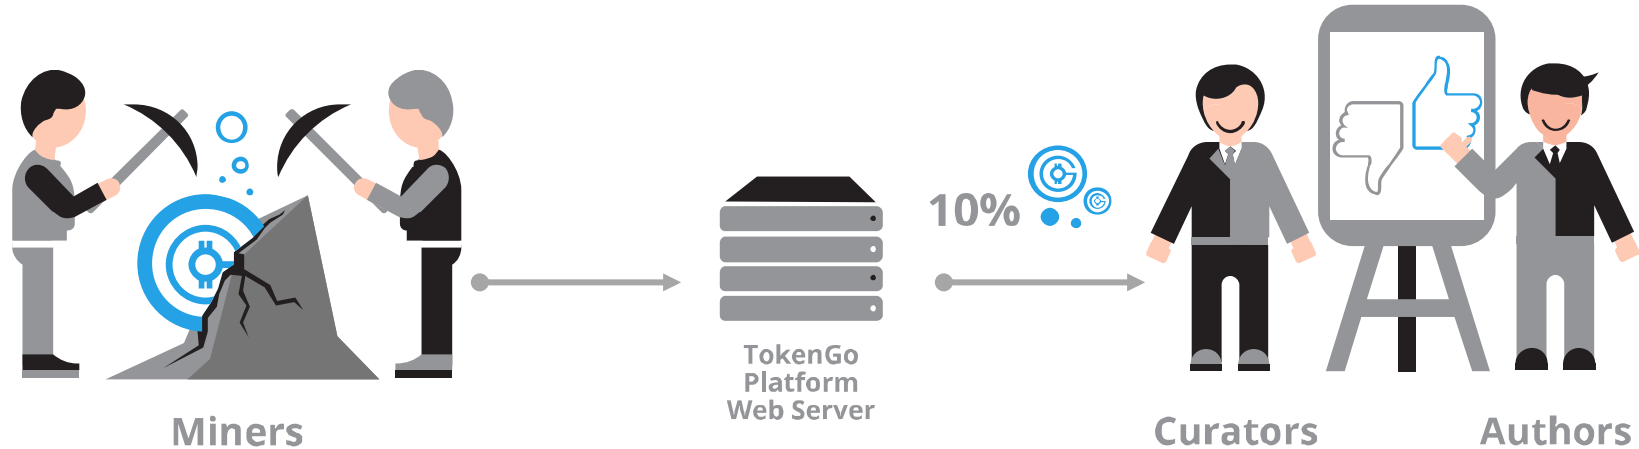

Karma - a parameter indicating the number of the Author's successful posts

**vote «like»
or «dislike»**

The Power of GoPower is 10 times higher than that of GoCoin.

Rewards for harvesting and activity

The total amount received for harvesting and activity is divided: 15% for activity (in proportion to all) and 85% for harvesting (distribution based on the results of the work, Voting Power, the number of likes, dislikes, etc.).

Remuneration shall be paid in coins GoCoin

GoPower Token Economy

Starting from the first day of the ICO procedure, the cost of GoPower tokens will increase by 0.5% a day.

Up to 90% of the total amount received from Minting is distributed among the GoPower token holders.

The final cost of GPT will be fixed on the last day of the ICO.

Distributing Tokens for ICO

The general scheme of distributing the whole amount of emitted GPT is as follows:

Total amount emitted	700 000 000 GPT
Amount put up for free sales	600 000 000 GPT
Reserve for mutual settlements with strategic partners and early investors	50 000 000 GPT
Reserve for the development team	30 000 000 GPT
Reserve for distribution during the Bounty Campaign	20 000 000 GPT

All unused tokens will be destroyed.

Distributing Tokens for ICO

ICO

Dates:	February - May 2018.
Soft Cap:	10 000 ETH.
Hard Cap:	250 000 ETH.
Finished on:	either by reaching Hard Cap or upon reaching the end of the ICO.

ICO Bonus Program

Minimum number of GoPower tokens to be purchased – 1 GPT. All the bonuses are cumulative.

Global Bonuses for ICO

the 1st week of ICO	—	30%;
the 2nd week of ICO	—	20%;
the 3rd week of ICO	—	10%;
the 4th week of ICO	—	5%.

Personal Referral Bonuses for ICO

When purchasing:

of 100 to 1000 GPT	—	5% to the invitee 10% to the inviter.
of 1001 to 5000 GPT	—	10% to the invitee 20% to the inviter.;
of 5001 to 10000 GPT	—	15% to the invitee 25% to the inviter.
of 10001 GPT	—	20% to the invitee 30% to the inviter.

Road Map

I quarter of 2017
- Birth of TokenGo idea

II quarter of 2017
- Team building
- Development of the project concept
- Organization of group work and prototype development
- White paper

November - December 2017
- Starting a campaign bounty
- Start PRE-SALE

January - February 2018
- Start ICO

May - June 2018
- End of ICO
- TokenGo Light Version Exchange Start
- Tokens GoPower can be sold / bought on the TokenGo exchange and other available exchanges

III quarter of 2018
- Release of the Alpha-version of the TokenGo platform
- Alpha Testing

IV quarter of 2018
- Release of the Beta version of the TokenGo platform
- Beta Testing

I quarter of 2019
- Official launch of the blockchain network, the web platform and the TokenGo harvesting

II quarter of 2019
- API integration, Co-development

III quarter of 2019
- Attraction of participants and formation of TokenGo community marketing campaign

IV quarter of 2019
- The full operation of the TokenGo ecosystem
- Development of community enlargement and business expansion conception in 2020

Conclusion

We develop TokenGo not only in order to create a new unique product based on proprietary mechanisms developed from scratch but also to reconsider and analyze all that has been done before. We take the most interesting and promising ideas and revise them to provide brand-new and highly sought after features!

TOKENGO

Tokenizing business.

Earning together!
